Far Infrared Pain Relief Patch

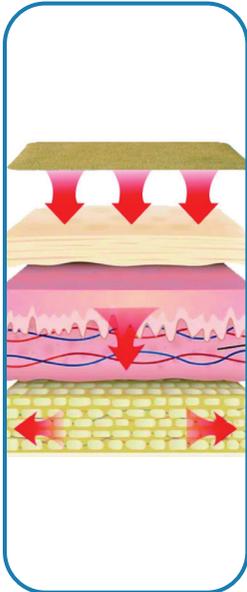

FAR INFRARED PAIN RELIEF PATCH

Biotechnology Network NZ's Far Infrared Patch is a medicated pain relief patch for sore muscles and joints associated with strains, sprains, backache and bruises.

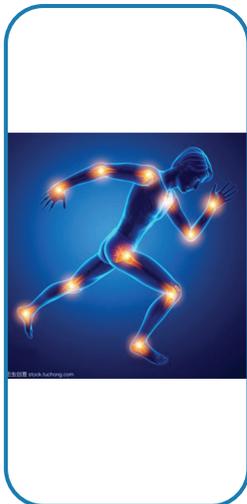

STRUCTURE & PERFORMANCE

The Far Infrared Patch contains largely traditional medicine ingredients processed with far infrared ceramic powder within a comfortable flexible fabric. The real beauty of our patch is the far infrared ceramic powder in the formula which helps improve blood circulation by expanding capillaries which in turn, stimulates increased blood flow and oxygen to the inflamed area. The benefits of this are excellent and include relief from joint pain, faster muscle recovery, relaxation, better sleep and improved range of motion. Biotechnology Network NZ's pain relief patches are carefully customised and manufactured exhibiting very flexible and easy to apply characteristics meaning you won't have any difficulty fitting them to areas of high movement such as elbows, shoulders and knees. This is an excellent pain relief option for people suffering from both acute and chronic pain.

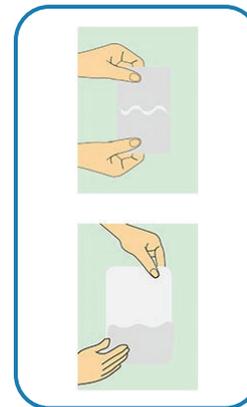

PRODUCT FEATURES

Far infrared technology has a variety of biological functions, such as expanding microvessels, increasing tissue blood flow, enhancing metabolic repair and regulating body balance. The biological effects of far infrared on the human body are mainly cell activation to cause a series of positive biochemical and histochemical changes in the cells, helping to keep the body in good health. Far infrared ceramic powder emits far infrared wave function, which can promote blood circulation and relieve muscle spasm, reducing pressure on anatomical structures. Infrared wave can promote local tissue microcirculation, aseptic inflammation, edema regression, reduce fiber connective tissue tension, relieve pain and promote the recovery of nerve and muscle function of the affected body part.

THIS PRODUCT CAN EFFECTIVELY RELIEVE THE FOLLOWING SYMPTOMS

- ✓ Treatment of cervical neck pain.
- ✓ Treatment of scapulothoracic periarthritis.
- ✓ Treatment of lumbar muscle strain and lower back pain.
- ✓ Treatment of shoulder and knee pain or soreness.
- ✓ Suitable for the treatment of any musculoskeletal pain or soreness.

PRODUCT INSTRUCTIONS

- ✓ This product is for topical use. It should be replaced once every 1-2 days with an interval of 1-2 hours between reapplying a new patch.
- ✓ Remove the release paper backing and apply to the affected body part.
- ✓ A small number of people may experience a mild skin allergy, this will subside after discontinuation of use. If a severe allergic reaction occurs, remove the patch immediately and see a medical profession if necessary.

CONTRAINDICATIONS

- ✓ Do not use on damaged skin, if you suffer from a skin related disease or have known skin allergies.
- ✓ Do not use if you are pregnant or lactating.
- ✓ This product is for external use only, oral administration is prohibited.
